

THINKING LIKE A SOCIAL ENTREPRENEUR TO TAKE HEALTH & SAFETY RESEARCH TO MARKET

Taking a social entrepreneur approach focuses us on creating impact, enabling the creation of innovative but practical solutions and utilizing multi-channel delivery to transfer knowledge and share research findings. This *Social Entrepreneurial Commercialization Model* was developed by: Glenn Cullen & Kim Slade

What might happen if we combined research expertise with entrepreneurial principles, product development and marketing expertise to:

- create impact,
- drive reach, and
- generate revenue that can be reinvested in research and prevention efforts?

COMMERCIALIZATION MODEL

Questions to Ask:

- What value can be created?
What is the purpose?
- How will impact be measured? (reach, revenue, or both)
- What evidence exists or is needed?
- Who can help? What skill-sets do I need?
- Is there a market for the problem or solution?
- Will this impact prevention?
- How will revenues be utilized?
